## European cultural route of reformation

ROUTES OF REFORMATION

## Our vision

Our Cultural Route is the reflection of centuries of histories, when movements of Christianity all around Europe shared the will to change the institutions and break the status quo.

We are a Transnational Route, built on the high level of participation of Churches, associations, public institutions and other stakeholders.

As an open and tolerant network, we combine the diverse aspects of Reformation across national boundaries: we value our differences and the plurality of Reformation histories, cultures and societies in our own regions. At the same time, we are united under the Routes of Reformation, which enhance our common heritage and values, standing out as a unique contribution to tourism and development of our territories.

We provide a varied, spiritual and unique experience in all territories involved, with an efficient management of the Route, with innovative and sustainable tourism practices, while communicating our Route in a contemporary way.
